Thinking creatively, learning faster and leading change. These abilities are at a premium in a highly competitive global business environment. This dynamic, highly-interactive program brings da Vinci's genius to life through fascinating biographical and historical information, setting the stage for an introduction to seven principles for thinking "a la Leonardo." Participants are then guided to apply the principles, using a proven series of practical exercises, to your organization's greatest challenges. Participants will learn how to cultivate creativity every day, balance analysis with imagination, sustain continuous learning, embrace ambiguity and uncertainty, apply "systems thinking" to problem solving, and nurture creativity and innovation in the workplace.
