SEMINAR DESCRIPTION

The purpose of this session is to provide managers from all departments with an understanding of financial reports, financial performance measures (ratio analysis), financial markets (risk and return measures) and the integration of finance and operations. The session is intended for middle and senior managers interested in how financial management can impact their decisions and opportunities. The session assumes no prior background in finance. Topics to be discussed include: the interpretation of financial statements; the use of ratio analysis to interpret how well the company has performed; operational levers that affect company performance; and the cost of raising money (cost of capital) in the debt markets and in the equity (stock) markets.
