LEADERSHIP TACTICS FOR INCREASING ENGAGEMENT, EFFICIENCY AND RESULTS

When it comes to leadership, there is no one size or one style that fits all situations. For over 50 years, Situational Leadership has proven to be a framework that transforms leaders, teams, and organizations. Situational Leadership is so effective because it encourages and equips the leader to adapt their style of leadership based on the competency level and willingness of the team member to successfully complete a specific task. In the midst of ever-increasing financial, time, and resource constraints in organizations, the need for dynamic and effective leadership is more important than ever. Situational Leadership consists of four developmental levels and four leadership styles. Dr. Scheer will teach you these important concepts in easy to understand, everyday language that will result in your ability to apply Situational Leadership immediately in your workplace context.
